

# Student install

- firstly install debian stretch on your computer
- secondly install the package sudo
- thirdly add the following to the end of your `/etc/apt/sources.list` file

`/etc/apt/sources.list`

```
deb http://floppsie.comp.glam.ac.uk/debian/ stretch main
deb-src http://floppsie.comp.glam.ac.uk/debian/ stretch main
```

## Student install

- now on the command line type:
- ```
$ sudo apt-get install dselect  
$ sudo dselect
```
- in dselect choose option '1' update
- now choose option '2' select
  - select the package pge
  - select the package python-pygame
  - now choose option '3' install
- it will download pge and all dependancies
