***Part A: Record of Submission (to be completed by Student)***

**Extenuating Circumstances**

If there are any exceptional circumstances that may have affected your ability to undertake or submit this assignment, make sure you contact the Advice Centre on your campus prior to your submission deadline.

**Fit to sit policy:**

The University operates a fit to sit policy whereby you, in submitting or presenting yourself for an assessment, are declaring that you are fit to sit the assessment. You cannot subsequently claim that your performance in this assessment was affected by extenuating factors.

**Plagiarism and Unfair Practice Declaration:**

By submitting this assessment, you declare that it is your own work and that the sources of information and material you have used (including the internet) have been fully identified and properly acknowledged as required<sup>1</sup>. Additionally, the work presented has not been submitted for any other assessment. You also understand that the Faculty reserves the right to investigate allegations of plagiarism or unfair practice which, if proven, could result in a fail in this assessment and may affect your progress.

**Intellectual Property and Retention of Student Work:**

You understand that the University will retain a copy of any assessments submitted electronically for evidence and quality assurance purposes; requests for the removal of assessments will only be considered if the work contains information that is either politically and/or commercially sensitive (as determined by the University) and where requests are made by the relevant module leader or dissertation supervisor.

**Details of Submission:**

Note that all work handed in after the submission date and within 5 working days will be capped at 40%<sup>2</sup>. No marks will be awarded if the assessment is submitted after the late submission date unless extenuating circumstances are applied for and accepted (Advice Centre to be consulted).

You are required to acknowledge that you have read the above statements by writing your student number(s) in the box:

Student Number(s):

<sup>1</sup>University Academic Misconduct Regulations

<sup>2</sup>Information on exclusions to this rule is available from the Advice Centre at each Campus

**IT IS YOUR RESPONSIBILITY TO KEEP RECORDS OF ALL WORK SUBMITTED**

| <p style="text-align: center;"><b>Part B: Marking and Assessment<br/>(to be completed by Module Lecturer)</b></p>  |
|--|
| <p><b>Assessment Task:</b></p> <p>Your task is to implement a macro module for PGE (macro.py).</p> <p>The module, macro.py, should allow the programmer to create macro objects from composite fundamental pge objects (circle, polygon and colour). A macro object should be able to be appended to the pge game engine as a series of pge primitives. Your macro object module should implement a number of transformations, such as: scale, rotate and translate. It should also provide an append function which populates the pge game engine with the content of a macro.</p> <p>You should also provide a commentary of your code which should not exceed 1500 words excluding code.</p> <p>The submission <b>must</b> be a single <b>pdf</b> file containing all code and description.</p> |
| <p><b>Learning Outcomes to be assessed</b> (as specified in the validated module descriptor <a href="https://icis.southwales.ac.uk/">https://icis.southwales.ac.uk/</a>):</p> <p>To identify the functional and non-functional requirements of a game engine/game design.</p> <p>Apply relevant software engineering techniques to develop applications to generate data for use in a game engine.</p>   |
| <p><b>Grading Criteria:</b></p> <p><b>A fail grade will be awarded for a submission which contains major errors and shows little understanding of the issues involved</b></p>  |

**A pass grade will be awarded for an submission which addresses the majority of areas with few errors or omissions.**

**An average grade will be awarded for submissions which contain a basic implementation.**

**A higher mark can be achieved if the work contains a good implementation and the start of independent thought in the coursework.**

**A high grade will be awarded for work which includes the earlier criteria and contains a high amount of independent thought, practical application and original contribution on the subject.**

**Your work will be marked out of 100% and broken down in the following categories:**

|  |            |
|--|------------|
| <b>Source code for implementation of macro.py</b>        | <b>60%</b> |
| <b>Description of the implementation (documentation)</b> | <b>40%</b> |

**Feedback/feed-forward** (linked to assessment criteria):

- Areas where you have done well:
  
  
  
  
  
  
  
  
  
  
  
- Feedback from this assessment to help you to improve future assessments:
  
  
  
  
  
  
  
  
  
  
  
- Other comments

**Mark:**

**Marker's Signature:**

**Date:**

**Work on this module has been marked, double marked/moderated in line with USW procedures.**

*Provisional mark only: subject to change and/or confirmation by the Assessment Board*

**Part C: Reflections on Assessment  
(to be completed by student – optional)**

**Use of previous feedback:**

In this assessment, I have taken/took note of the following points in feedback on previous work:

**Please indicate which of the following you feel/felt applies/applied to your submitted work**

- A reasonable attempt. I could have developed some of the sections further.
- A good attempt, displaying my understanding and learning, with analysis in some parts.
- A very good attempt. The work demonstrates my clear understanding of the learning supported by relevant literature and scholarly work with good analysis and evaluation.
- An excellent attempt, with clear application of literature and scholarly work, demonstrating significant analysis and evaluation.

**What I found most difficult about this assessment:**

**The areas where I would value/would have valued feedback:**
