

## Double check PGE builds on your system

- to check PGE builds on your system you will need to download the source for PGE

```
$ cd  
$ mkdir -p Sandpit  
$ cd Sandpit  
$ git clone https://github.com/gaiusm/pge pge-initial
```

## Building PGE

- you can build a local copy by:

```
$ cd  
$ mkdir -p Sandpit  
$ cd Sandpit  
$ rm -rf build-pge-initial  
$ mkdir build-pge-initial  
$ cd build-pge-initial  
$ ../pge-initial/configure --prefix=$HOME/opt --enable-langc  
$ make
```

## Testing your local copy of PGE

```
$ cd  
$ cd Sandpit/build-pge-initial  
$ ./localrun.sh ../pge-initial/examples/springs/bridge.py
```
