

Running your own Penguin Tower server

- can be done by opening a terminal and typing the following:

```
$ cd  
$ ./opt/bin/ptower-server ./opt/share/ptower/maps/star
```

- to stop the server, type ^C (press down the control key and then press the c key, now release both keys)
- there are a number of maps in the $\text{\$HOME}/\text{opt}/\text{share}/\text{penguin-tower}/\text{maps}$ directory
 - m1, star and glover
 - star is the smallest (5 rooms)
